

# Drew Stromberg

*Software Engineer with a strong Frontend focus*

Expertise: React, Typescript, NextJS, Node, React Native, Redux, Firebase, CSS/Tailwind, React Query, Jest/Cypress  
Looking for: long term Senior or Leadership roles

## Professional Experience

### **Co-Founder, Founding Engineer, Prisms AI** ([prisms.ai](https://prisms.ai))

Short term entrepreneurial engagement/self-employed: January 2023 - present

- Build, test, release, and rapidly iterate MVP with intention to raise funding for a self-serve no-code AI platform
- Lead product discovery and refinement: work with Co-Founders, product advisors, and early users/customers to create and refine UX, identify and correct product pain points, and identify and build necessary functionality
- Assist with developing product and company vision, pitch deck, story, and go-to-market strategy

### **Founding Frontend Engineer, Roadforge Software**

Full time: August 2022 - January 2023

- Work with CEO and CTO in early-stage startup with unclear/changing requirements to build MVP
- Assist with hiring and onboarding initial team
- Communicate with leadership and backend team to plan sprints and fill in missing gaps in team knowledge
- Implement and maintain frontend architecture, code standards, branching strategies, and testing protocols, develop and nurture company culture

### **Frontend Engineer, Gondola Travel**

Short term contract engagement: June 2022 - August 2022

- Own entire Gondola Platform frontend
- Work with CEO, Head of Engineering, and Head of Product to develop product vision and roadmap
- Design, implement, and maintain frontend architecture and code standards

### **Senior Frontend Engineer, Principle Studios**

Full time: 2021 - 2022

- Promoted to Frontend Lead midway through project
- Develop custom client app from the ground up
- Coordinate with backend developers and project managers to implement APIs and client requirements
- Assist with story pointing and task creation
- Write and review unit tests
- Review other developers' PRs, assist with onboarding of new frontend staff

### **Freelance React Native Engineer, Walter Picks**

Short term ad-hoc engagement: 2021

- Assist startup with developing components for fantasy football app
- Convert loose requirements and mockups to functional deployed code

**Founder, Founding Full Stack Engineer, Tour Boogie ([tourboogie.com](http://tourboogie.com) / personal project, acquired by Gondola Travel 2022)**

Full time: 2020 - 2021

- Design, develop and deploy complete full stack web application
- Features include: built-in CRM, booking system, payment processing, and website manager

**Developer II, Hawkeye Agency (formerly Epsilon)**

Full time: 2016 - 2020

- Develop pixel-perfect templates for Google Account
- Assist Management with project scoping and defining technical requirements
- Work with Team Lead to develop and implement coding standards, assisted with code reviews
- Assist QA with understanding testing requirements

**Web Developer, Students for Sensible Drug Policy**

Full time: 2011 - 2016

- Produce responsive custom WordPress and Drupal themes/plugins for a national nonprofit organization
- Develop new WP site with custom theme, migrated content/functionality from ModX installation
- Work with stakeholders and organization leads to determine needs, budget, product, and timelines
